

EAST COAST RAILWAY

Office of the  
Chief Commercial Manager  
Bhubaneswar

**Commercial Circular No. 12(G)/2013**

Date: 25.01.2013

Sub: Fixing of weightometer in the Pay-loader.  
.....

For loading of bulk and loose commodities at different sidings and goods sheds, it has been observed that pay loaders are used as a mechanical means to load such consignments into open wagons supplied by Railways. All such loading tasks are accomplished on an approximate basis leading to overloading of wagons and consequent payment of overloading penal charges by customers.

In order to reduce overloading in such situations and also to prevent levy of penal charges after weighment, customers should be advised to install standard weightometer of appropriate design on their respective pay-loaders so as to prevent overloading of Railway wagons.

This advisory should be given wide circulation amongst customers using pay-loaders at sidings and goods sheds.

( M. N. S. RAY )
