

Future vision

- 1) **POH of LHB Type coaches:** - The workshop has started POH of LHB coaches. The activity could be started with the existing setup. However additional facilities are being developed for taking up all POH requirement of East Coast Railway.
- 2) **Increase POH of AC coaches:** - At present the workshop could turnout at an average of 16 AC coach per month which is required to be increased to 25 coaches per month to meet future requirement.
- 3) **Increase Corrosion outturn:** - The present capacity of shop is for 16 corrosion repair with internal restructuring and outsourcing of noncore activity viz. cutting of corroded metal pane and stripping. This is required to be increased to 24 coaches per month to meet future requirement.
- 4) **Fitments of Bio-toilets:** - Railway Board has given allotment for provision of retro fitment of 132 nos. Bio toilets in coaches to CRW/ Mancheswar. Material for above has ben received and prototype coach with biotoilet fitment would be turned out in May'2014..
- 5) **PU painting of coaches:** - All new coaches are provided with PU Painting. The workshop has already started PU painting of coaches through outsourcing.
