

East Coast Railway

Engineering Department

OFFICE OF THE
CHIEF ENGINEER
B-79, RAIL VIHAR
BHUBANESWAR

CE's Circular No. 11

Sub: Schedule of Inspections for the curves

01. In terms of Para No.124.A (4) and Para No. 139.A (4) of IRPWM the schedule of inspection by PWI (not in overall incharge) and CPWI / PWI in overall charge is once in 6 months by rotation including A & B routes. The book let titled "Manual of Inspection Schedules for officials of Engineering Department" circulated by Railway Board and printed by C.E., South Eastern Railway also stipulates schedule of inspection for the curves for PWI (not in overall incharge) and CPWI / PWI in overall charge of the section. As per this booklet, the schedule of inspection for PWI (not in overall incharge) and CPWI / PWI in overall charge is once in 6 months by rotation except for Group A & B routes in BG where the inspection should be done once in 4 months. It is noted that some confusion exists in the field on account of above discrepancies in stipulated schedule of Inspection.

02. Henceforth the schedule of inspection for PWI (not in overall incharge) and CPWI / PWI in overall charge of Group B route will be once in 4 months by rotation as stipulated in the above booklet printed by Chief Engineer, South Eastern Railway.

(J. S. Tolia) 14/7/04
Chief Track Engineer
