No.GM/V/ECOR/BBS/System Improvement /1453

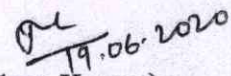

dt.19.06.2020

To  
The PCE,  
East Coast Railway,  
Bhubaneswar.

Sub: System improvement regarding transportation of P.Way materials.

During a preventive check conducted in WAT division for the transportation of P.Way materials, it is observed that P.Way materials are first received at Central Depot at WAT and then these materials are transported to different PWI depots through other contracts. This leads to duplication of the work and additional expenditure. This practice may be prevalent in other divisions also. It is suggested that the materials may be supplied directly to PWI depots as per the indents to avoid double expenditure. It is requested to kindly issue necessary guidelines to divisions in this regard.

This issues with the approval of the SDGM.
