Sub: System Improvement for plantation of saplings through agencies.

Ref: Dy. CVO/ECOR/BBS's letter No. ECoR/V-3/Engg/PC/139/20/1931 dt. 12.08.2020

Vigilance department during a preventive check for plantation of saplings has found that the survival rate of plantations is less than 50% and suggested the following system improvement vide their letter under reference to ensure improvement of survival of plantations (copy enclosed):

"Plantation of sapling should be done through professional agencies like Forest Development Corporations under State Government. Survival of the saplings should be 100%, and maintenance should be for 3 years. Census of the plants to be maintained, along with a number and name of the species of the plant displayed on a tag provided on the trunk."

This is for your information and necessary action please.

Encl: As above.
