Dt. 14.02.2022

To
The Pr. Chief Engineer
East coast Railway
Bhubaneswar.

Sub: Systemic improvement in connection with "Detailed description & specifications for NS items included in contracts."

During a preventive check in a work, it was observed that fixing of tiles were executed as a NS item. The item specified use of Tile of certain brands i.e., "2/3 manufacturers & its equivalent". Detailed specifications for the item could not be traced in the agreement. Stipulating a particular brand of products encourages restrictive trade practice.

Thus, it is hereby suggested, in future, any NS item should clearly elaborate about the item to be operated. Invariably, the specification of the item should describe the quality of materials to be used, procedure of execution, type & method of tests on the materials and parameters to be achieved at the completion of different stages of work. These should form an integral part of the Special conditions of contract along with the details of schedule of test-checks to be conducted by different authorities, ensuring quality compliance in any work. These should accompany as an annexure with NIT & LOA.

Action taken in this regard may be intimated to this office within 15 days of receipt of this letter. This issues with the approval of SDGM.
