Sub: Prescribing size and specification for disposal of unserviceable materials.

During a vigilance investigation into a complaint it was revealed that the size and specification for disposal of PVC materials in POH depot was not specified. In the absence of the size for condemnation/ scrap there is every possibility of misusing the serviceable materials in disguise of un serviceable materials in usable sizes. Also it is advised to impart some inalterable marks on scrap materials of such type to prevent fraudulent use.

In the above context it is recommended to prescribe strict guide lines for size and specification in disposal of PVC materials and other such type of materials dealt by your work shop to avoid fraudulent use and pilferage of materials.

This issues with the approval of SDGM/ECOR/BBS.
